

New townhouse close to the beach from builder in Denia

Denia

38.85534968913377, 0.03158569335937501

alasa Terra is the second development of Talasa Utopian Village, and in its first phase, it will feature 65 homes, apartments and townhouses, with 2 and 3 bedrooms. Following the sustainability and energy efficiency approach of Talasa Utopian Village, the designers have created a project where terraced single-family homes predominate. Always seeking the utmost respect for nature, the project is conceived with brilliant sustainable strategies: rainwater collection, channeling, and reuse systems that will give life to a lush sustainable ecosystem; refreshing gardens with native species that require minimal maintenance; large surfaces of photovoltaic panels for self-consumption energy generation; even multiple charging stations for electric mobile vehicles. This residential concept provides an environment where communal spaces are accessible to all residents, while each home has its own private spaces, both indoors and outdoors, for daily enjoyment. In Talasa Terra, the communal areas breathe a natural and welcoming atmosphere. As you explore its different areas, you will find perfect spaces for walking, sports, and, above all, for cycling. Experience a unique lifestyle in this residential community, where every detail is designed for your comfort and enjoyment. Dive into the refreshing pool, train in the gym, relax in the sauna, and share unforgettable moments with family and friends in the social club. Puerto de Talasa is a communal area that will allow you to enjoy La Almadraba beach in its purest essence. All Talasa Utopian Village residents will have access to this beachfront space where they can organize their own events, park their bicycles, store nautical equipment, and take a shower or dip in the pool after enjoying the sea.

Overview
